

## Our Mission and Vision

### Mission;

To carry out quality assurance system supported testing and analysis activities and to provide accredited laboratory services for the entire metal alloys sector, especially the Iron and Steel sector.

To train manpower for the Iron and Steel sector with the support of certificate and graduate programs.

To support R&D studies within the scope of university-industry cooperation.

To create platforms where scientists and sector representatives come together by organizing scientific events (such as symposiums, workshops, seminars).

### Vision;

To be a center of excellence for R&D activities of new qualified and high added value products in the Iron-Steel and metal alloys industry.

To support research in the field to develop new technologies for sustainable development.

To raise awareness to reduce CO<sub>2</sub> emissions through the use of new technologies.
